Thinking About the BIG IDEAS of Fractional Number Sense

BIG IDEAS	Notes (examples allists allists allists all means)	
	Total Intelligences, Salins of Outer Intelligences, Salins of Outer Intelligences	sings)
Fractions are equal parts of a whole.		
A whole or unit can be divided into equal parts in many different ways.		
A unit may be a single object or may be a collection of things.		<u> </u>

Getting the Most Math out of Routines

				INNOVATIONS
Name of the Routine	What math learning does it support?	How does the math learning change over time? (Write in new focus/ how emphasis shifts)	How much time does it	How does the time it takes change
			take dalily (over time?
